

THE FIELD2BASE PLATFORM

Field operations without paper, delays, or data gaps

Field2Base helps enterprise teams digitize the forms they use every day — then automates what happens next, so work keeps moving from the field to the office.

- Digitize your exact forms
- Works offline
- Ad hoc & pre-filled forms
- Workflow automation
- Analytics & dashboards
- Enterprise integrations

BUILT FOR TEAMS LIKE YOURS

Field Service

Work orders, dispatch & service reports

Construction & Engineering

Daily reports, QA/QC & jobsite safety

Healthcare

Clinical documentation & compliance, offline

Utilities & Energy

Inspections & asset condition, live GIS

Safety & EHS

Incident reports, JSAs & safety audits

Government

Regulatory inspections & permitting, audit-ready

REAL IMPACT FOR YOUR BUSINESS

Days → min

From field capture to office visibility

~50%

Less time spent on documentation

100%

Complete, validated submissions — required fields enforced

20+ yrs

Trusted in regulated, field-heavy industries

Trusted from the Fortune 500 to the small business — across field service, construction, healthcare, utilities & government.

HOW IT WORKS

Four steps from paper to insight

01 DESIGN

Build powerful digital forms in minutes

- Drag-and-drop builder
- Business rules & logic
- No coding required

02 CAPTURE

Collect accurate data in the field

- Mobile & offline capable
- Photos, signatures, GPS
- Real-time submission

03 CONNECT

Automate workflows & connect systems

- Approvals & routing
- Dispatch & work orders
- Branded reports & alerts
- APIs, exports & integrations

04 MANAGE

Oversee users, security & operations

- Dashboards & analytics
- Roles & permissions
- SSO, MFA & devices

MORE THAN A FORMS APP

A complete field operations platform

Digitize your exact forms

Recreate your paper forms exactly — same layout and branding — now with dropdowns, calculations, and complete, legible data.

One app for every process

Inspections, work orders, safety checks, audits, timesheets, incident reports — all in one app instead of dozens of tools.

End-to-end digitization

Pre-fill from your systems, capture offline, route through approvals, and map data to your ERP, GIS, or CMMS automatically.

Built for real field conditions

Offline-first and rugged-device tested — built for the technicians, inspectors, and nurses doing the work.

POWERFUL FEATURES

GPS Tracking

Signatures

Photo & Video

Barcodes

Calculations

Conditional Logic

Date / Time

Dropdown Lists

FITS YOUR TECH STACK

Connects bi-directionally to the systems you already run — clean field data out, records back to pre-fill forms. Common targets:

ERP

GIS

CMMS / EAM

CRM

Dispatch & work order systems

Accounting & billing

BI & analytics

Document management

REST APIs & webhooks

CSV / SQL exports

COMMON USE CASES

Inspections & safety checks

Audits & checklists

Work Orders & Service Tickets

Fleet & DVIR

Quality control

Time & materials tracking

Logs & records

Application & intake forms

Official & agency documents

SECURE & RELIABLE

SOC 2 Type II

Independently audited controls

HIPAA Aligned

Protected health data workflows

Microsoft Azure

Enterprise-grade hosting

99.99% Uptime

Reliability you can trust

READY TO STREAMLINE YOUR OPERATIONS?

**Capture data. Automate
processes.
Gain real-time visibility.**
